

## NEW PASS & TICKET OPTIONS

The transition to electronic fare boxes starting May 2017 will open the door to new, more flexible, payment options.

This change will effect customers riding express routes 917 through 927. For express customers on those routes who also ride CTtransit local, CTfastrak, or express routes 901 to 915 the payment options and passes described here may be familiar.

*Please note, passengers on the 918, 919, and 950 routes will continue to use the tickets and passes they are familiar with. If you obtain your tickets or passes through your employer, please make sure you note which route you ride when ordering to make sure you receive the correct item.*

Starting in May 2017, customers may begin using magnetically encoded tickets and passes. The 31-day pass will replace the monthly pass. Being able to use the 31-day pass increases the flexibility of when passes are purchased and used. Customers will no longer need to obtain and use a pass within a defined month. The 31-day pass is good for 31 consecutive days starting from the first use of the pass.

Ten-trip paper “punch” style tickets will also be phased out, and customers who wish to use 10-trip tickets should purchase the magnetically encoded tickets (also available for all express fare zones). Ten-trip tickets do not expire.

*During the transition phase, both the “legacy” tickets and passes and the magnetically encoded items will be valid for travel.*

Please refer to the “before and after” guide on the right to determine which ticket or pass is right for you.

Payment by cash is always an option. If a transfer (2-hour pass) is needed, that should be requested at the time the fare is paid.

Starting in May 2017, fare boxes onboard CTtransit local, express, and CTfastrak buses will issue transfers (2-Hour Passes) and All-Day passes using bar-code reading technology. Express transfers (2-hour passes) will retain the full value of the original zone fare paid, providing unlimited local and express rides for the number of zones paid.

Magnetically Encoded  
for Use in the Fare Box

*Note: due to a delay in production, Zone 5 magnetically encoded 31-day passes and 10-ride tickets will not be available until this summer. Zone 5 customers should continue to use the Monthly pass and punch tickets.*
