

# EXPRESS PASS & TICKET OPTIONS

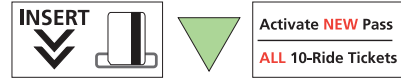

On (or soon after) September 3, all CTtransit express routes will be operated using blue & silver CTtransit buses. All these buses will now be equipped with fareboxes, and will accept all payment methods including Go CT Card and magnetically encoded 10-ride tickets & 31-day passes.

The monthly passes, and the “punch style” 10-ride tickets will be discontinued. Customers should purchase the equivalent 31-day express bus pass for the zone they ride, or a 10-ride magnetically encoded ticket for the express zone they ride.

Customers using 10-ride tickets will continue to need to request a transfer, which will now be used as a bar-coded transfer from the fare box. Express transfers (2-hour passes) will retain the full value of the original zone fare paid, providing unlimited local and express rides for the number of zones paid.

September monthly passes will continue to be accepted; simply swipe your pass through the card swipe at the top of the farebox. However, no monthly passes for October will be sold.

Punch-style 10-ride tickets will also continue to be accepted until they are used up. To use a magnetically encoded 10-ride ticket or need to activate a new 31-day pass, simply insert the ticket or pass into the ticket “dip” as you board.

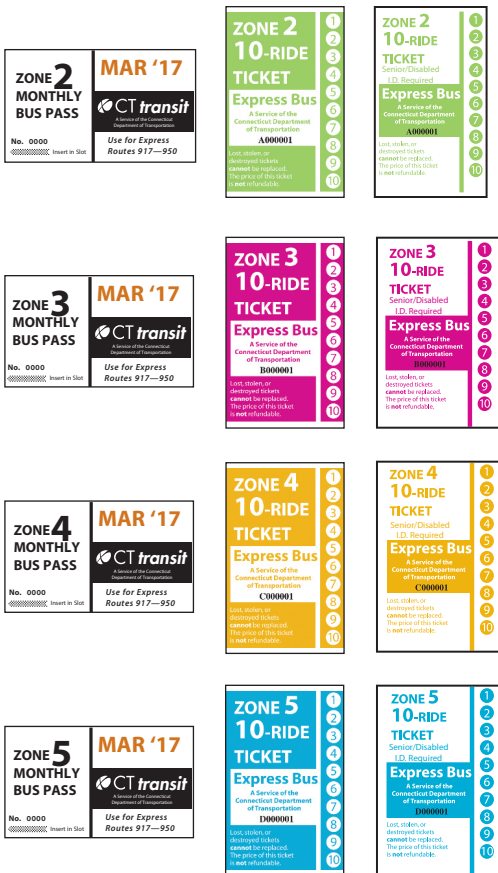

Please refer to the “before and after” guide below to determine which ticket or pass is right for you.

Payment by cash is always an option. If a transfer (2-hour pass) is needed, that should be requested at the time the fare is paid.

## before and after

### Pass Shown to or Punched by Operator

### Magnetically Encoded for Use in the Fare Box
